KARTIK PARMAR

Full Stack Developer | Backend Engineer | MERN Stack Specialist
kartikparmar.dev@gmail.com | +91 9773405142 | Gujarat, India | github.com/kartikparmar

PROFESSIONAL SUMMARY

Full Stack / Backend Developer with 2.5+ years of production experience engineering scalable MERN stack applications. Proven expertise in Redis caching, MongoDB indexing, RESTful API design, rate limiting, and AWS/Cloudflare infrastructure. Delivered systems handling 500+ concurrent sessions with sub-200ms API response times. Strong foundation in system design, real-time WebSocket architecture, and performance tuning for high-traffic platforms.

CORE SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, PHP
Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, REST API Design, WebSockets, Rate Limiting
Database: MongoDB (indexing, aggregation), Redis (caching, TTL), SQL, Supabase, Firebase
Cloud & DevOps: AWS (EC2, S3), Cloudflare (CDN, WAF, DDoS), Docker, Linux, Git, GitHub
Performance: Redis Caching, API Optimization, Lazy Loading, Code Splitting, SSR/SSG
Security: JWT, RBAC, Cloudflare WAF, HTTPS, Input Sanitization
AI/ML & Tools: LangChain, n8n, IBM AI/ML Internship, AR.js

PROFESSIONAL EXPERIENCE

Full Stack Developer (Part-time) | **OneDiplomas** | *Remote* | *Apr 2024 – Mar 2026*

- Engineered 4+ production MERN applications handling 500+ concurrent sessions; implemented Redis caching and query optimization, reducing average API response time from 850ms to under 190ms.
- Designed and documented 20+ RESTful API endpoints with Express.js, applying rate limiting (express-rate-limit) to throttle abuse and maintain 99.9% uptime under peak load.
- Optimized MongoDB collections with compound indexing and aggregation pipelines, improving query performance by 40% across high-traffic data sets.
- Implemented JWT-based authentication with RBAC across 3 platforms, enforcing least-privilege access and eliminating unauthorized access incidents entirely.
- Integrated AWS S3 for media storage and Cloudflare CDN for global delivery, cutting server response time by 25% and achieving near-zero downtime.
- Delivered sprint features 15% ahead of schedule via proactive code reviews, reusable component architecture, and early risk identification.

Frontend Developer (Part-time) | **S Kumar & Co** | *Mumbai* | *Sept 2023 – Feb 2024*

- Built and shipped a fully responsive React.js + Tailwind CSS company website, achieving a 98/100 Google PageSpeed score through image compression, code splitting, and lazy loading.
- Improved mobile UX Lighthouse score by 45% and delivered the full development lifecycle — requirements to deployment — 2 weeks ahead of deadline.
- Developed a reusable React component library with 15+ modular UI components, reducing future development effort by 30%.

PROJECTS

v2enterprise.in — E-Commerce Platform — *Node.js, Redis, MongoDB, Cloudflare, Express.js, React.js*

- Implemented Redis caching (TTL-based invalidation) on product and catalog APIs, reducing average response time from 800ms to 180ms — a 77.5% latency reduction.
- Engineered multi-gateway payment integration processing 300+ transactions in the first month with zero failed payments due to retry logic and idempotency keys.
- Deployed Cloudflare WAF + DDoS protection, blocking 95% of malicious traffic while maintaining 99.9% platform uptime.

citytrail.site — Cab Booking Platform — *MERN Stack, REST APIs, MongoDB, Real-Time Tracking*

- Architected booking management REST APIs with Express.js and MongoDB; applied indexed queries and connection pooling, reducing booking confirmation latency by 60%.
- Supported 200+ registered users with real-time ride scheduling and status tracking; designed schema with compound indexes for geospatial and time-range queries.

eaglebyte.in — Digital Transformation Platform — *Next.js, Node.js, MongoDB, AWS, Cloudflare, SEO*

- Implemented SSR and SSG with Next.js, improving page load speed by 50% vs. legacy PHP and achieving 92/100 Lighthouse performance score with top-5 keyword ranking.
- Deployed on AWS EC2 with Cloudflare DNS and CDN, reducing global delivery latency by 30% and achieving near-zero downtime SLA.

Women Safety App — Gujarat Vidhyapith Hackathon — *MERN Stack, WebSockets, Real-Time*

- Built a real-time location tracking system using WebSockets (Socket.io), enabling live sharing with trusted contacts at under 2-second latency.
- Implemented SOS alert with automated emergency contact notification, reducing average response time by 65% vs. manual distress calls.

Public Grievance Reporting System — *MERN Stack, RBAC, Node.js, MongoDB, Email Notifications*

- Engineered multi-level RBAC for citizens, officers, and admins; achieved zero unauthorized access incidents across 100+ active user grievances.
- Built automated email notification pipeline triggered on complaint status change, improving resolution acknowledgment rate by 70%.

AR Culture Showcase — IIT Delhi Hackathon — *MERN Stack, AR.js, REST APIs*

- Selected Top 15 at IIT Delhi Hackathon; engineered AR.js-powered platform managing 50+ cultural artifacts with headless CMS APIs for non-developer curators.

PROBLEM SOLVING & DSA

Data Structures & Algorithms:

- Proficient in core DSA: Arrays, Linked Lists, Stacks, Queues, Binary Trees, Graphs, and Dynamic Programming.
- Applied algorithmic thinking in backend design — e.g., graph-based route mapping (citytrail.site) and priority queuing for AI-assisted task suggestions (IIT Gandhinagar Hackathon).
- Practices competitive problem-solving with focus on time/space complexity optimization and scalable algorithm design.

EDUCATION

Bachelor of Computer Applications (BCA) | **MKBU University** | *Gujarat, India* | *2023 – 2026*
Sem 4 SGPA: 7.64 | Focus: Programming, Data Structures, Computer Applications

ACHIEVEMENTS & CERTIFICATIONS

- IBM AI/ML Internship (2025, Ongoing) — Hands-on training in machine learning model training and applied AI systems.
- Top 50 — Ahmedabad Odoo Hackathon 2025 (500+ participants).
- Top 15 Finalist — IIT Delhi Hackathon, AR Culture Showcase Platform.
- Participant — IIT Gandhinagar Hackathon, AI-Powered Project Management System.
- Best Innovative Idea Award — Flash Innovation Event, Shree Swaminarayan Cluster of Science (2023).
